

RG-OSP-004-D

FIRST RESPONDER RUGGEDIZED VISION EMERGENCY SYSTEM

MSRP \$81,480.00

Utilized to provide initial diagnosis and management of eye injuries occurring on the battlefield and detects, diagnoses, treats and manages ocular disorders, injuries, disease and visual dysfunctions in U.S. fighting forces or supported humanitarian missions. Intended for regular or repeated collection, analysis, archiving, interpretation, and distribution of health-related data used for monitoring the health of a population or of individuals, and for intervening in a timely manner to prevent, treat, or control the occurrence of disease or injury, which includes occupational and environmental health surveillance and medical surveillance subcomponents in austere environments.
